

category ● balanced ● high win / low pick ● low win / high pick

A scatter plot showing the relationship between Pick Rate (X-axis) and Win Rate (Y-axis). The X-axis ranges from 0% to 15% with major ticks every 5%. The Y-axis ranges from 44% to 54% with major ticks every 2%. A dashed black regression line indicates a positive correlation. Most data points are blue circles, but one point at approximately (10.5%, 48%) is a brown circle. The data points are scattered around the regression line, with a notable outlier at approximately (11.5%, 53%).
